Lesako M (Project Manager) was excused from the meeting due to an emergency that occurred that day.

4. Agenda

1. Introduction of project team and purpose of project
2. Introduction to Click Computer and Accessories business operations
3. Identify and confirm current process
4. Identify specific problems with the current approach
5. Confirm stakeholder requirements
6. Discuss scope expectations
7. Confirm next steps

5. Discussion Points

Item	Discussion Summary
1. Introduction	The project team introduced themselves and explained the purpose of the project: to develop a client support platform for Click Computer and Accessories as part of ITC327W - Systems Analysis and Design. The team apologized for the rescheduling and thanked the stakeholder for his time.
2. Business Overview	Prince Morafo explained that Click Computer and Accessories provides computer and electronic support services to clients. Clients may require assistance with cellphones, laptops, printers, televisions, and other electronic equipment. The business operates primarily through walk-in clients and phone calls.
3. Current Process Confirmation	The stakeholder confirmed that clients currently contact the business directly via phone or in-person. Staff manually record requests using handwritten notes or informal

	spreadsheets. Technicians are assigned based on availability and expertise, but this is done informally without a structured system. There is no formal tracking system in place.
4. Current Process Problems	The following problems were confirmed by the stakeholder: • Delays in receiving support • Difficulty communicating technical problems clearly • Requests being missed or forgotten • Difficulty assigning requests to appropriate technicians • Limited visibility of request progress for clients • Increased workload for support staff • Poor communication between clients and staff
5. Stakeholder Requirements	The stakeholder confirmed the following requirements: • Simple client application • Client registration and login • Device menu showing supported devices • Problem and service selection • Simple request submission with description • Request status tracking • 24/7 active management (discussed further) • Technician assignment capability • Administrator controls for managing users and requests
6. Scope Discussion	The stakeholder confirmed that core request management functions are in scope. Physical repairs and payment processing are out of scope. The stakeholder agreed that notifications, asset information, and supporting evidence could be treated as lower priority features. Regarding 24/7 active management, the stakeholder understood that this is an operational responsibility requiring staff availability, not just a software feature.

6. Key Interview Findings (Confirmed by Stakeholder)

1. Current Process Issues

- Clients contact the business directly via phone or in-person
- No structured system for tracking requests
- Difficult to assign work to appropriate technicians
- Clients have no visibility into request progress

2. Stakeholder Requirements Confirmed

- Simple client application (REQ-01)
- Client registration/login (REQ-02)
- Device menu (REQ-03)
- Problem/service selection (REQ-04)
- Simple request submission (REQ-06)
- Request status tracking (REQ-07)
- 24/7 active management (REQ-08) - clarified as operational
- Technician assignment (REQ-10)
- Administrator controls (REQ-11)

3. Scope Confirmation

- In scope: Core request management functions
- Out of scope: Physical repairs, payment processing
- Notifications, asset information, and supporting evidence retained as 'Should Have'

7. Action Items

Action	Responsible	Deadline
Finalize requirements document based on interview findings	Hlalele D	26 August 2026
Prepare requirements sign-off document	Winkel K	26 August 2026
Schedule online meeting for requirements sign-off	Nosenga B	26 August 2026
Begin drafting SRS document	Hlalele D	26 August 2026
Begin feasibility analysis	Molefe B	26 August 2026
Begin risk identification	Ndlovu N	26 August 2026

8. Next Meeting

Date	26 August 2026
Time	2:00 PM
Location	Online (WhatsApp)
Purpose	Requirements confirmation and sign-off
Attendees	Available team members and Prince Morafo; Project Manager Lesako M was excused from the 25 August 2026 meeting.

9. Sign-off

Role	Name	Signature	Date
Stakeholder	Prince Morafo	<i>p morafo</i>	25 August 2026
Project Manager	Lesako M	Excused (Emergency)	25 August 2026
